in the document. You can embed an R code chunk like this:

```
library(kableExtra)

a <- tibble::tribble(
  ~Variable,      ~Type,      ~Description,
  "is_canceled", "Categorical", "Indicates if the reservation cancels their booking."
)

kbl(a, booktabs = T) %>%
kable_styling("striped", full_width = F)
```

Variable	Type	Description
is_canceled	Categorical	Indicates if the reservation cancels their booking.

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
